3 Major Promotion Strategies

Fostering private entities
for smart agriculture
innovation

Expansion of the
introduction of
smart agriculture by item

Strengthen the
foundation for
smart agriculture growth

KFARM

**"Gathering of future agriculture leaders in
one place to generate businesses."**

Institutional

corporate

buyers and
investors

- * Introduction of outstanding private technologies
and the spread of digitalization
- * Providing space for technical collaboration between private companies
- * Establishing a startup space for future businesses/farms

◎ Groundbreaking improvement in agricultural productivity, sustainability, and resilience

▶ Fundamental solutions to agricultural challenges such as manpower, pests, natural disasters, and quality control

◎ Fostering smart agricultural technology · service industries and securing global competitiveness

FarmTech Forum

AgTech Planning Center

Agricultural Machinery and Materials Exhibition

Smart Farm Exhibition

Major Participating Buyers

“Majority of the influential buyers in the agricultural industry will visit.”

Smart Farm Exhibition

Agriculture is growing more advanced, and the combination of technology and agriculture is leading to the rapid development of the agricultural environment. Many farms have already started using smart farms, and technologies suited for each cultivation environment are continuing to be researched.

The K-FARM Smart Farm Exhibiton is a business space that creates an environment that for agriculture applications by introducing future agriculture, smart farm and smart factory, urban agriculture, and technology innovating the agricultural environment.

Category

Future Agriculture (Smart Farm)

Growth Environment Integrated Control System, Growth Information DB analysis system, Maintenance Solution, Automatic Control Solution, etc.

Smart Factory Facilities and Devices

Farm automation machinery/material/parts, Plant Factory, Smart Greenhouse, Internal/external Environment Management Equipment

Urban Agriculture

Functional Vegetable Garden, Hobby Farming, Weekend Farm, Home Plant Cultivation Machine, Cultivation System, Hydroponic System

Agriculture Machinery & Equipment Exhibition

If agriculture has been developing around the labor force until now, it will develop according with cutting-edge technology

in the future, and Korean companies securing technology for future agricultural machinery and agricultural materials will provide the pump for industrial development. K-FARM introduces a Korean-style future agricultural work model and a vision for Korean agriculture centered around the establishment of basic infrastructure, automation through the combination of agriculture and robot technology, unmanned technology, revitalization of advanced agricultural machinery production.

Category

Cultivating and Grounding Machines

Agricultural Tractor, Cultivator, Farm Master, Rice Paddy Machine, agricultural excavator, etc.

Harvesting Machines

Grain transporters, Agricultural Harvesters, Farm Power Transporting Vehicle, Combine Harvester Threshing Machine, Trailers, etc.

Rice transplanting/planting/seeding machine

Power planter, Power seeder, Rice Planter, Rice-plating Machine, Seedling Box, etc.

Parts and others

Agricultural ladders, Rotary Blades, Hydraulic Cylinders, Safety Lights (Warning Lights), Agricultural Machinery Parts, etc.

K Smart Livestock Exhibition

The livestock industry is a high value-added industry based on the distribution and processing industry and plays an important role in the economic sector. The livestock industry is a high value-added industry based on the distribution and processing industry and plays an important role in the economic sector. Korea's livestock production is more than 25 trillion won, accounting for about 40% of the total agricultural production, of which Gyeonggi-do Province ranks first in the country with 19.2%. In addition, Gyeonggi Province announced a plan to invest 42.7 billion won to build a future livestock system based on science and technology using information and communication technology in response to livestock industry tasks such as revitalizing the rural economy, sustainable resource circulation agriculture and strengthening food security. Under this trend, KFARM seeks ways to increase livestock farm income and lays the groundwork for future livestock environment systems.

Category

Livestock Equipment

Livestock Equipment and Facilities,
Livestock Product Sanitation and Processing Facilities, etc.

Longitudinal Contraction Sector

Variety, Breeding Improvement, Biotechnology, etc.

Fodder

Mixed Feed Equipment and Products,
Feed Additives, Nutritional Supplements, etc.

Production Sector

Production Technology, Farm Management,
Consulting, Farm HACCP, etc.

Pharmaceutical Sector

Animal Medicine, Disease Prescription,
Hygiene and Quarantine, etc.

Information Sector

Livestock-Related Publications, Information,
Distribution and Computer Management Systems, etc.

6th Industrial Exhibition

The 6th industry is a convergence of primary, secondary, and tertiary industries. It is a new industry that generates high-added value by processing high-value-added products using agricultural products and expanding into service industries such as experience programs using local resources. The government

has set the goal of creating jobs and added value in rural areas through the 6th industrialization. It is promoting projects to support the diversification of management by producers such as farmers and businesses in agri-food processing and distribution rural tourism. KFARM introduces everything in the 6th industry, including the latest agricultural products processing, packaging technology, logistics system-related products and technologies, and best practices.

Category

Packaging

Packaging Machinery, Packaging Materials, Machine Parts, Packaging Materials, Agricultural Products Containers, etc.

Distribution/Logistics

Standardization of Agricultural products, Distribution and Logistics system post-harvest management and other processing facilities, Storage Facilities, Wholesale and Commodity Broker, etc.

Agricultural Products, Agricultural Food

Agricultural Processed Products, Agricultural Specialties, Eco-friendly Organic Food and Products, 6th Industry Food, Functional Food, Traditional Food, etc.

2025 FARM-TECH FORUM

FARM-TECH FORUM provides a meeting place with top experts in the agricultural and fisheries industries and related food and technology fields, and provides the latest industry trends. It provides an opportunity to understand and come up with new business ideas. This year, We are holding a forum on this topic. Government, universities, companies and industries are discussing how the agriculture and fisheries industries are changing with tech companies. You can hear vivid opinions from experts and executives. In the rapidly becoming more advanced after the coronavirus pandemic, We hope you gain the know-how to succeed in the Food Tech and AgTech industries

KFARM

KFARM is an exhibition to help companies grow in line with the trends and needs of the times, such as digitalization and carbon neutrality, and to enhance the understanding of the people.

It will be reborn as a key window for general agricultural growth, securing global competitiveness, forming public consensus, and disseminating government policies.
